

An Appeal to the Politically Homeless

Opposition to women's liberation is two pronged:

- * from the right, asserting control over our reproduction; seeking to ban access to abortion
- * from the left, asserting control over our sexuality; seeking to objectify our bodies for the profits of pornographers, pimps, traffickers

Democrats have collaborated with our disappearance with their support for gender identity ideology. They have played political football with sovereignty over our bodies; they have failed to acknowledge that we have ratified the Equal Rights Amendment; they have collaborated to stack the Courts with hostility to Roe-v-Wade's protection of our privacy rights; failed to prioritize legislation which would have given clear Congressional intent to protect women's access to abortion.

Its time we had a political party of our own!

The Green Party of the United States, is at serious risk of being thoroughly captured by gender-identity ideology.

No candidate can successfully contest for power and lead our communities back from the brink, unless they offer thoughtful courageous leadership, grounded in material reality.

Our success depends on your financial and volunteer contributions to the effort, as a party member, volunteer, activist, candidate for internal leadership or for local public office.

Your generous contribution helps us to wage a struggle for the very soul of our feminist valuing political party.

Authorized and Paid for by the
Gender Critical Greens PAC * T. Pettersen, Treasurer
